Feasilbility Analysis

The idea of NU-BigEye came to us as an extended version of college moodle service, with the inclusion of connectivity among students and faculty. Fixing the small problems with the existing service, for eg. the much visible lack of interest of Students in the existing chatting features, and sharing news about Competitions inside and outside the University ranging from Academic to Extra-curricular makes this website highly useful. Also a single platform for all Campus activities allows for the much needed organization of data for users of the site. The addition of the alumni allows also for the creation of discussion forums between them and the students about placement and guidance.

We sent the Google form asking the opinions of various individuals including faculty and students about core functions of NU-BigEye. After a large number of responses it is clear that most of the people opted for Placement News, Suggestions by Faculty and Alumni for placements and Aptitude Challenging Practice Questions.

Among numerous thoughtful suggestions, many people have asked us to include a chatting feature, preparations for various competitions like GSoC, MSP or ACM ICPC.
